

ABOUT ME

A young graduate from Barcelona who started his student journey in BAU, making **Graphic Design and Visual Communication** the basics of my training. I believe design is everywhere, making this the reason for involving myself in the industry.

During this time, I discovered UX and UI which widened my initial vision on the topic. Soon I realised that merging software development and graphic design, made the possibilities in creating endless. For this particular reason, I decided to continue my training at ISDI Coders, studying **Full Stack Web Development**.
