Experience

Silt Digital ID — Front End Developer   2022 – present

Design and develop dynamic interfaces using Vue.js, TypeScript, Nuxt.js, and Vuex.

Craft wireframes in Figma to refine user interaction and visual design, streamlining customer onboarding processes.

Contribute actively to expedite customer acquisition strategies and boost conversion rates through continuous optimization and innovation in frontend development.

ISDI Coders — Full Stack Developer & Teacher   2021 – 2022

I guided students in building complete web applications using modern technologies such as React, Redux, TypeScript, Styled Components, Next.js, Material-UI, Firebase, Node.js, Mongoose, Express, MongoDB, and Docker, among others.

Provided support in problem solving and understanding programming concepts.

Enhanced my technical skills and communication abilities.
